EDUCATION

College Of Technology, GBPUAT <i>Bachelor of Technology in Computer Science</i>	2022 – 2026 Pantnagar, Uttarakhand
• Coursework: Data Structures, Algorithms, Databases, Operating system, Computer Networks, Computer Architecture, Theory of Computing, Machine Learning, Software Engineering	
BSF Sr. Sec. Residential School, Kadmatala <i>Secondary School (PCM) (CBSE Board)</i>	2020 – 2021 Kadamtala, West Bengal
BSF Sr. Sec. Residential School, Kadmatala <i>High School(CBSE Board)</i>	2018 – 2019 Kadamtala, West Bengal

CERTIFICATION/TRAINING

Bolt IOT <i>Web Development Trainee</i>	July. 2023 – Aug. 2023 (Remote)
• Developed responsive frontend interfaces for IoT-based applications inspired by Bolt IoT, enabling real-time visualization of sensor data and device status using React and REST APIs • Implemented dynamic dashboards and optimized UI performance to handle high-frequency IoT streams, improving rendering efficiency and user interaction	
Internshala <i>Machine Learning Trainee</i>	July 2024 – Aug. 2024 (Remote)
• Built and trained machine learning models using Python, Pandas, NumPy, and Scikit-learn for prediction and classification tasks. • Performed data preprocessing, feature engineering, and visualization to improve model accuracy and extract meaningful insights from datasets.	

PROJECTS

Real-Time Collaboration App (Google Docs Clone)

- Engineered a real-time collaborative document editor (Google Docs-like) supporting 50+ concurrent users per session, enabling live editing, cursor tracking, and user presence with **<100ms latency** using **Socket.IO**

Data Intensive Dashboard

- Created a data-intensive analytics dashboard using React to visualize and analyze **50k+** records with interactive charts (using **D3.js/Recharts**), implementing dynamic filtering, sorting, and drill-down features for real-time insights

SKILLS

Languages : C/C++, Python, JavaScript, Bash, Java, HTML/CSS

Dev Tools : Tailwind, Bootstrap, React, Redux, node.js, Express, JWT, Axios, Git/Github, FastAPI(python), LaTeX, Postman

Deployment Tools : Vercel, Netlify, render, railways, Docker

Databases SQL, MongoDB
